

For six years we've been selling WFL water ionizers to our customers and they continue to tell us all the benefits they've received. Please spend some time reading these testimonials, many are quite touching, and they illustrate the power of alkaline, antioxidant water.

[Read how our alkaline, ionized water has helped people like you.](#)

"You with your new newsletter must be a mind reader, I was just going to contact you to let you know how happy we are with our Genesis Ionizer.

I had been having lots of back and knee pain for 4-5 years just walking was a struggle for me, I do mostly natural health practices so I had no diagnosis, just lots of body pain, I mean lots. I woke up to pain and went to bed in pain, struggling to get to sleep. (My brother has Rheumatoid Arthritis so I figure that is probably what I have (my grandpa had it bad))

We got the Genesis unit in early January of 2009, after approximately 3 months one morning I woke up and all my body pain was gone. I was amazed, yet scared to say anything for fear of its return, the second day no pain. It took me a few weeks, to realize it was probably the water I had been drinking. What really cinched it was in May I went to visit my mom for a few days. I did not have my water with me, and within 3 days I could feel some pain coming back. Since then I take my water everywhere I go.

I feel this water has also helped my digestion and bowels, and my husband, who has had years of digestive problems, is much better now.

I am thankful for having found the wonderful Genesis Ionizer and would suggest it for anyone who wants improved health.Thank You."

Mary Ann Riffe, Dayton Ohio

"Dear Sirs,

I want to let you know the final reason my wife & I bought the Genesis water ionizer from your company(which we had installed,and are now enjoying drinking its water).

I had Googled several web pages that compared the Genesis with other water ionizers,and

Genesis always came out on top ,on all features. Yet, I did not know the purchasing integrity of your site.However,when my wife and I saw that Ed Bagley Jr. was on your site as an endorsement of Genesis, it was the clencher for us to purchase this productfrom your company.

I know that EB Jr. was paid to endorse the product,but I also know that he is a staunch environmentalist which includes not only protecting the outside Earth invironment, but also protecting ones personal health. And that he would not allow himself to endorse a product just for the money....And because of his integrity, we chose to buy Genesis on your site."

Sincerely,
Robert M.Anthony,Ph.D.

"I am using ionized water for 2 years now and selected the KYK Harmony first which produced the best results at the time of all machines I could test personally. I now own the Genesis (5 plate) for over 6 months and I have to say that this is even better. It especially produces more accurate pH/ORP in situations where the city provides water with a pH of 8.5 already such as in North Dallas, TX (but an ORP of +200 or worse). The Genesis can handle this situation perfectly and not only produces great tasting water, but our health is in very good shape. This is the only water we drink if we can. It also is great to make Ice-Tea (no boiling water needed, just use PH 9.5 Water). We love the machine. Very well built as well, easy to connect."

Peter G. from Carrollton, TX.

"I cannot say enough about the Genesis, it works perfectly, the installation was simple, and the water tastes great."

Dan Alter, CEO of the No 1st Cost List.

"We absolutely love our KYK Genesis. My husband felt a shift in his energy as soon as he started drinking the water. It is helping us to release toxins, and my children prefer the taste over bottled water. Thank you so much!"

Allison Gaess, Nevada City, CA

"A friend at work told me about a "Water Ionizer" he bought and was telling me how he was losing weight without dieting. Just drinking the water. He gave me a sample of the water and it tasted pretty good. I asked how much the machine cost and thought it was a little pricey. A couple months later I went to get a haircut. While waiting for my barber I heard him telling the person he was cutting about a "Ionizer" he bought for his wife who had "Arthritis" real bad and how much it was helping her in a very short while. When I got in the chair I asked if it was really helping her that much and he said OH YEAH. Then he told me how the water strengthens the "Immune System" so your body can fight diseases. So I grabbed Manny at work and said I'd like to try a machine as I had some Arthritis in my shoulders and hips. It seemed to be getting worse. In three weeks I noticed the seemed to be lessening. What really amazed me was I had "Vertigo" real bad for almost seven years. In the middle of the second week, I noticed I was stepping out when I walked like I used to. I realized my Vertigo" was gone and it hasn't bothered me since. That alone was worth the cost of the machine. If

someone was to try to take my machine from me I think I'd have to kill'em. the machine pays for itself many times over."

Sincerely,

Ron Radvonik

"Greetings Alderin,

As a Water for life USA distributor, I like to have personal contact with my customers so I offer them free installation and delivery. I have Genesis 2500 and the seven-plate 3000 installed from the west coast to the east coast. I know that many people are being helped by drinking the ionized alkaline water, but what tickles me the most is when their filters run out and they tell me they cannot drink any other water. One of the reasons being that the other waters are so hard to drink, and they can feel Genesis ionized water going into their cells and being absorbed into the body.

I look at this distributorship as more of a "ministry to health" than I do to work, and I have many testimonies to all that this water is doing.

Thank you for all your good support.

I do look forward to greater sales to help others."

Sincerely, Tom Holmquist

"Alderin:

My testimonial...

I have been drinking Genesis ionized water since October 2008. At that time I weighed 450 lbs and was taking medications for high blood pressure, type II diabetes, cholesterol and other heart-related issues. It is now June 1, 2009 and I have lost 70 lbs, cut my blood pressure medication from 200 mg per day to 50 mg per day, eliminated Glipizide for my diabetes, cut Metformin (diabetes) from 2000 mg per day to 1000 per day and routinely never see a blood sugar finger stick above 130! I have also eliminated or reduced dosage on (3) other medications.

In addition to all of the above benefits, I am sleeping better and feel more energized during the day. Most importantly my attitude has improved because I know I'm taking action that is improving my health and allowing me to live much longer than if I would have had I continued on my path.

I highly recommend the KYK Genesis Water Ionizer and Water for Life USA."

Jim Smith
Anaheim, California USA

"Dear Mr Ordell,

My wife and I have been using your New KYK 7-plate water ionizer since January 2009. We got ours from your first shipment that arrived from Korea.

We cannot say enough good things about both the machine and our results. First of all it is extremely easy to use -- just set it and forget it! It does the rest with just the touch of 1 button.

Also within just a short time, I noticed that I was needing fewer and fewer antacid tablets. Now I can't remember the last time I needed one -- the bottle is mostly full. No more getting up at night to fix acid reflux -- it's great! We know we will see even more benefits as our bodies' pH levels continue to improve.

A friend wanted to sell us a brand that he was marketing but the price was too high for our budget. After a thorough Google search, we determined that in our opinion the improvements in the KYK actually exceeded the features of the other brand for less than half the price.

With the money back guarantee and the 5-year warranty you offer at Water for Life, we felt we had nothing to lose and we are VERY thankful that we made this decision.

We can recommend your Company and your product without hesitation."

Yours truly
Ron & Peggy Caylor
Atlanta, GA

"Dear Alderin,

Our company, Traditional Oriental Health Center, just purchased 5 Genesis Ionizers.

Our company is all about health -- spiritually, mindfully, and physically. We are practitioners of Chinese Medicine and Hypnotherapy, and we provide health care for achieving balance in our lives. We are all vegetarian, practice Qigong and have healthy lifestyles.

I only give this information for reference, to let you know something about our knowledge level.

This testimonial is strictly my own experience, using the Genesis Ionizer:

I am sixty-seven years young, ex-British Special Forces, and I know the value of balance and tranquility in our lives. As we become mature, our bodies require more hydration, with the highest alkaline, purest, low acid water available to us. Even with my training of what our body requires to be tranquil and balanced, the weak link in the chain has always been the quality of available drinking water.

I live in Sidney, British Columbia, Canada. Our water from the tap is most likely some of the very best in the world for purity and clarity. This water directly from from the tap is pH 6.2 -- it is already acid. Acid bodies are sick bodies. Acid in our bodies is the cause of ALL disease in

our body. There is definitely a need for acid water. It has many healing and sanitizing properties; we just should not have an acid body system.

I know that most people will probably not believe what I say about this product; that will unfortunately be their loss. My life is so much more tranquil, knowing that I can control my acid levels in my blood. Although my wife and I have only used the Genesis for a short time, we are extremely grateful for all the health benefits it is making to our personal health. We are healthier, happier, energized, and more active than before. I am happy to take part in your testimonial.

I will be happy to go (on and on,) into further benefits I have received from using the Genesis should you wish.

I look forward to a long, healthy and prosperous relationship with both you and Water for life USA."

Fred Gordon
fredgordon@shaw.ca
Traditional Oriental Health Center

"My husband and I are very happy with your machine. We have way more energy. Before we had to take lots of herbs to have energy, spending way more money than we wanted to. Now we feel better. I have celiac disease; the Genesis has helped my colon from being so irritated and swollen. Unbelievably, it has also helped my allergies. My husband also has low blood sugar; amazingly this machine has lessened this problem. It is way more affordable than other machines. This is the best machine for the money."

Renaeb Webb

"WFL,

For four months now I have been providing water to people who live in my building as well as my friends though they have been slow in getting into using it. Those that have made the shift say they are very pleased with how it makes them feel and that they are aware of the great differences from bottled water and do not wish to go back.

Personally I am very thankful that this product is available. I don't go anywhere without it. Just today someone came to see me and they were feeling very tired.

I suggested they try the water and 2 glasses later their energy was back and they were ready to get on with their day feeling refreshed and energized.

If I eat anything that makes my belly feel uncomfortable I just drink a glass or two of the KYK water and it sorts things out quickly.

I just let the water speak for itself."

Elinas

"Alderin,

For products I have an analyst mindset and do lots of research of the technology and products. I have been introduced to another product first where I learned about the ionizing technology. I knew already for some time that an alkaline body is a healthy body. I started my internet research and decided to try the water of a \$4000 Kangen Water machine as well as the KYK Harmony side by side. I considered both products the best on the market for home use at this time.

I purchased test equipment to actually validate the water output. I have to say that I am now convinced after comparing both new machines that the Harmony is the by far superior machine. It produces more precise pH and the actual measured ORP by far exceeds the one of the more expensive unit. The Harmony is adjustable, whereas the other unit has no adjustment capabilities whatsoever. We were taking excellent food supplements for years but immediately after using the water we have seen tremendous additional health benefits. Within 3 days my wife had heavy detox reactions and a 180 degree mood improvement. The coffee tasted so good that other people wanted to purchase the unit just for that. I already released several pounds of weight (along with weight reduction patch) which worked much better with the water.

I already know the the decision to buy this unit was one of the best investments I have made in years for ourselves. I am now totally convinced about the Harmony and look very forward to spread the word and recommend it to all my circle of influence."

Kind regards,
Peter Geier, Dallas, TX

"Hi Alderin, Just thought to share with you the following. I installed a KYK Genesis machine for my daughter about four months ago and got this report a couple days ago."

Sincerely, Tom Holmquist

"Hi Dad!

Wanted to share my results from the doctor with you!

My **Hemoglobin** (a protein which enables the RBC to distribute oxygen throughout the body – the amount of oxygen in the body tissues depends on how much hemoglobin is in the red blood cells) was **12.7** (Normal Values 11.0 – 16.0 g/dl) **Cholesterol 183** (Normal Values <200 mg/dl) **HDL 70** (Normal Values >35 mg/dl) and **Triglyceride <45** (Normal Values <150 mg/dl).

My doctor was impressed with how my results improved from last year!! **I'm convinced that the ionized water** has increased the oxygen in my blood and helped balance me out!!!

Love you!"

Miriam

"Dear KYK,

We bought a KYK Harmony from you in January. We love it!!! Our daughter-in-law is expecting a baby. She was diagnosed with pre-clampsia (sp?) on March 21 at about 30 weeks along. Her doctor told her that her kidneys and liver were in trouble. They told her

to (sorry if this is a gross thing to say but it is important) collect her urine for 24 hours and bring it in to be tested to see if they needed to take her baby early.

She stopped at her alternative health care lady, Cindy, to see what she had to say about the pre-clampsia. Cindy told her she needed to drink a minimum of 80 ounces of 9.0 pH water every day.

Well, we rushed our KYK up to their house and hooked it up and she guzzled KYK water from Friday afternoon until Sunday when she started her collection, and then kept guzzling. She took the sample in to them on Monday morning.

She found out the results of the test on Wednesday, March 26, and guess what??? Her doctor said, "Your kidneys and liver are doing great." She didn't tell him why, but we all know why -- it is the water she drank from your KYK machine that helped her be better. She is continuing to drink her 80+ ounces daily and we're hoping and praying that she can carry this baby to full term with the help of the water. We don't dare bring home the water machine because we want her baby to go to full term.

So, we have decided to give them that KYK machine and buy us another one."

PS Thank you again so much for making it possible for us to own a KYK Harmony machine. We had someone try to sell us an Enagic for \$4000 and we just can't afford that kind of money and besides your machine is superior to theirs. For half the cost of an Enagic we can have one for us and one to help our daughter-in-law."

Dale and Pat Rice
Manti, Utah

"Hi Alderin!

Some of the KYK water effects:

- in less than 2 months, I lost 4-5 kilograms, and 4-5 cm fat on my nipping
- my head was totally hairless on the middle (3-4 years ago), and now the hair begins to grow
- our patients like the taste and the effects of the water. Most of them suffer from constipation, and when they drink the water, they don't have constipation
- the water increases the positive effect of bioresonance therapy (probably better hydration, better conductivity)

Please transmit our patients' and our personal thanks to Mr. Kim Young Kwi. He is a great scholar."

Thanks, nice to meet you
Mr. Zolst, Hungary

"Hi Gary:

Thanks for dropping the water off; Kris and I were in the office when you came.

I was out of water for a few days, and I noticed a big difference! In the short time that I've been drinking the water, I've been able to cut back on my diabetic medicine, and I just stopped taking a prescription that they said I would have to be on for the rest of my life. I don't know if it has to do with the water, or the fact that I had all the dental work done. I'm leaning toward the water because my whole system is changing.

My doctor's office is hoping that this dental work will be a key component in resolving some of my medical issues. If so, they suggested that I speak about it, and it would be a great way to introduce the water.

Thanks so much for getting me the water on a regular basis."

Barb

"Hi Alderin,

Thank you very much. I appreciate the automatic warranty. I am really excited about your product. It is a good looking unit, it functions perfectly, and seems very sturdy. It came with all the needed fittings and more. I was using it the evening that I received it.

I am a very happy customer and thank you for the great customer service. The water is delicious and if I see any positive health results with me, my family, or my cats, I will certainly give you a good news update.

Take care and best regards,"

Rick

"Alderin,

I have just finished my first 7 days with my KYK water unit. It is amazing! Thank you for your efforts in bringing this machine to the USA. I am enthusiastic about sharing it."

David, Georgia

"Since I haven't been to a doctor in a good while, I decided to go and visit him. I was down 37 pounds and my blood pressure, heart rate, and body temperature were well within range. He told me the last time I went to see him to get blood work done and a colonoscopy. I did neither. However, my health has greatly improved no thanks to him. He realized that as well because he mentioned how much weight I have lost.

He printed me a couple of papers and was insistent that I get my blood work and a colonoscopy. So, I made an appointment with the "Digestive Specialist" he referred me to. While on the phone, I began to inquire about costs. The girl on the phone told me the

procedure had a \$1300 price tag attached. I didn't let this phase me even though I knew this would be an out-of-pocket expense for me and also probably did not include the anaesthesiologist fee.

I went to the appointment and filled out the paperwork given to me. I sat back down for several minutes until they called me back to the window. The girl there told me that since this is January and they know we haven't made our deductible, I would have to pay up front. I had to inquire about the cost which I found out was \$200. This is to see the doctor for a consultation only. Needless to say, I passed. If you do the math here, we are looking at a cost of about \$2,000 for a procedure I may not need with no guarantee whatsoever. I really do feel that I don't need the procedure because the several people I have talked to who own a water machine said their colonoscopy had come out clean as a whistle.

My doctor told me about colon cancer and said it could be fatal if not caught early. He did not respond when I told him that cancer cannot live in alkalized cells. I am also sure he has had other patients who have bought a machine and he has seen the tremendous results as well. He refuses to talk to me about a machine.

When I tell people what the machine will do for them, they refuse to believe me. They tell me we all are going to die someday, etc. Well, if I am going to die someday anyway, why should I spend \$2,000 on a medical procedure?? My life isn't worth \$2,000 just as many others aren't worth \$1500 for a machine they could be sharing with family and friends."

Manny Wallace

www.mywater4life.net

"Dear Alderin,

Dr. Gerone is buying a machine from me soon. She is an ENT doctor/surgeon, but has a dual practice in Holistic medicine. She has been detoxing me for over a month now. I got a QFA/BTA test a month ago and had a follow up test today. I have lost 30 pounds in 30 days without changing my diet. She has me on a number of enzymes and stuff. I had been drinking alkaline water a week before I first saw her. She said that alkaline water was the best therapy for detox, so I bought a machine. (a great one at that!)

My mother is in love with her machine and I am sure in a week or so all of her friends will want one. I am also considering placing a small ad in a Holistic health newspaper called Aquarius that is popular around here."

S. Grant, Georgia
Hi Alderin -

"Just wanted to let you know that we are very pleased with the Harmony ionizer we purchased from Water for Life USA. It's very well designed and easy to operate. For me, having the ORP reading is a real plus, since that is possibly more important than pH. The color coded LCD makes it very easy to see what's going on.

I usually run the ionizer on the "pH 10" setting for drinking water (several glasses a day) and for making green drinks.

I am delighted that my pH (as measured from saliva and urine) has increased with drinking ionized water. I am also hydrating better (being 65 yrs. old, hydration is quite important).

Thanks for guiding me to purchase this unit rather than other units."

Ken Kaufman, PhD, North Carolina

"The prime reason I bought my Harmony water ionizer about a month ago was that I was hopeful that it might help to relieve my my digestion problems that would typically keep me awake for half the night. For the past 25 years, I lived on acid reducers, having tried every over-the-counter brand as well as a few prescription jobbies. However, ever since I started using my ionizer a month ago, I have not had the need to take a single acid reducer. More importantly, I sleep better (not perfect, but much better). However, the other benefit from using the ionizer is just as dramatic and something I never expected. I had complained to doctors for many years that I was never able to exercise for more than twenty minutes at a time nor exercise more than two or three times a week even though every doctor would tell me to exercise more. It seemed that my muscles and lungs would reach exhaustion after twenty minutes of exercising, and it was practically impossible for me to exercise two days in a row. However, since using my ionizer, I am able to not only exercise five or six times a week, but also exercise longer (up to 40 min.) each time. Obviously, it was the higher pH and the additional oxygen from the ionized water that made the tremendous difference. Maybe you ought to tell Barry Bonds."

Thomas , New Orleans

"I purchased my Harmony as a Christmas gift for my husband. I know the health benefits are there but the most noticeable is that the water just tastes so much better than our tap water or water through a "Brita" filter. Another amazing benefit is the effect on my house plants. I save the discharge water and use it to water my plants. My cyclamen, peace lilly, and African violets are all flowering as never before -- they are loaded with blooms. The greenery is healthy and lush. I never expected this result. Anyone with house plants will be thrilled with the side benefit of the alkaline ionized water."

Pamela Haukaas , Hawaii.

"My experience stems from a close family member with cancer and a quick education on how cancer cells tend to react to a alkaline environment in the body. I purchased a unit and did a pH test on my wife and I before we started using the new alkaline filtering system. I tested fair and the wife was acidic. We began the use of the alkaline water for drinking, cooking, etc. along with good diet and vitamin supplementation. In approximately two months we retested our pH levels and the wife and I both improved our pH substantially. Unfortunately our family member was diagnosed too late with their cancer for anything to help. But, I have a cat that has cancer and the vet wanted to put her down in February of this year but we needed time to accept his recommendation. We put her on a better diet and began giving her only alkaline water and four months later her strength and appetite is returning along with the reduced swelling of her glands caused by the cancer. Was it the alkaline water??? All I know is my cat is living a fairly normal life four months after her vet's recommendation to terminate her life. I

am not a doctor and have no formal education concerning medical issues. All I know is my body and my family members have seemed to benefit from lots of alkaline water, good eating habits and appropriate vitamin supplements. I will continue to drink healthy for life!"

Randy Webb, Wisconsin

"I had read about the importance of pH balancing, and even about a healing resort in Switzerland with natural mountain stream water with a pH of 9 (a little alkaline) that has healed many people of a variety of diseases. I measured the pH of my tap water to be a pH of 6 (slightly acidic), and my reverse-osmosis water to be a pH of 5.5 (more acidic!). I bought my Harmony water ionizer because I was concerned about health problems caused by drinking and cooking with this water. I set it to output with a pH of 9, and my wife and I use it for all drinking and cooking water.

I found that I craved this water and drank more water over the day than before because it tasted so good. After a few days, we both noticed that our feces were dark and goopy, but there was no discomfort. This continued for about a month, and then our feces went back to normal. Since the same thing happened to both of us, and the water was the only thing we changed, we knew it was the water that caused this cleansing effect. We were surprised to get this effect since we had both been taking Primal Defense probiotic for several years. We both feel better after having switched to the Harmony water ionizer."

Jeremy, Sacramento, CA

"Purchasing the Harmony purifier has been one of the best decisions I have made for my family. After I had tried the alkaline water on two occasions, I had wanted to purchase one. The water is incredible...it is so easy to stay hydrated because it tastes so good! We cook with it, we make our coffee with it and we notice that even our "green" drinks mix up differently, the greens stay in suspension in the drink, and it tastes good! I use the acid water on anything that I want to deodorize and it works...water bottles, sponges, dishcloths, etc. no longer smell stagnant. I love my Harmony and would recommend this purifier to everyone!"

Jolene, Toledo, Ohio

"One of the first things I noticed with the Harmony purifier mode was when I had used it as a water supply for my Salt Water Aquarium. These fish are notoriously delicate and susceptible to water contaminants. I kept having problems with keeping my fish alive, but after switching from tap water to the purified water out of the Harmony, my fish were surviving. I then figured that if the tap water was slowly killing my fish, what could it be doing to us who drink it daily? Now, I drink almost all my water from the Harmony. Thanks Water for Life USA!"

TR, Carmichael, CA
